Landing Pads For Water Slide Exits

Safer landing surfaces, cushioned, and slip-resistant without being abrasive

At WhiteWater, we understand the value of safety for your guests and park. Designed to meet the safety and quality standards of tomorrow's water parks, our slide pads are more than just aesthetic features. Preventing injuries resulting from slipping and falling at slide exits, these slide pads provide a safer cushion for little feet to land on, preventing guests from scraping their knees and stubbing their toes as they hit the ground, while also reducing the chances of impact injuries, significantly.

The 7/8" slide pad tiles will never absorb water and remain slip-resistant even when submerged. Water parks all over the world are choosing our slide pads because of the material's incredible durability, safety, and warranty. Designed for children's slide or landing pads on mini-multis, and pools with a water depth of 24".

"We have definitely noticed a major decrease in our reports. We hardly have any slip and falls on the flooring. It's very nice for our staff--it helps with any aches and pains because it's a softer floor. Everyone here, from the guests to the desk staff, have been singing its praises."

- Bamboo Bay, Tropics Waterpark, Shoreview, MN

Unparalleled Durability, Safety, & Customization

- **Durable:** Designed to withstand high volumes of barefoot traffic, our slide pads are warranted for five years.
- **Versatile:** Modular 2-0'x2-0' tiles allow for custom sizing, design, and installation. Operators commonly choose 4'x6', 4'x8', and 6'x6' layouts in various color options.
- **Hygienic:** Watertight RepelCell™ technology inhibits all water and pool chemical absorption. The material's closed-cell nature also inhibits the growth of harmful mold and mildew.
- **Slip-Resistant:** Slide pads become more slip-resistant when wet.
- **UV Stable:** Tiles are designed to withstand exposure to sunlight, preventing colours from fading away.
- **Cushioned:** 7/8" thick and passes all CPSC-ASTM 1292 tests for impact attenuation to drop heights of 4-0'.
- **Customized:** With a variety of different options for sizes, colours and designs, the tiles can be customised as per your facility's unique needs, giving you the flexibility and choice that you deserve.
- **Visual Appeal:** Available in different colour options, landing pads can help you accentuate your park's look, while keeping it safe.

Adding landing pads to your slides is a great way to improve your guest safety without breaking the bank – give Life Floor a try on this small scale to see the big difference it makes.

Contact us now to take the first step towards softer landings.

WHITEWATER®

EST. 1980

WhiteWater was born in 1980 with one clear purpose, to create places where families unite and make joyful lasting memories.

We achieve this by standing alongside our customers from concept to completion of award-winning attractions, from slides to water rides and everything in between. We aim to inspire our clients by unleashing our creativity to realize their ambitions; we craft solutions which make each park unique. We are dedicated to making products that operators can count on, because we understand the importance of reliability and efficiency on the bottom line.

As market leaders, we put our success down to our attitude, in all our years we've never once forgotten why we're here – to help parks solve problems, create immersive experiences, and delight guests all over the world.

We're here to create places where fun can thrive.
